Myeongju Kim

Environmental engineer and M.S.E. candidate with experience in geospatial analysis, environmental modeling, climate-risk assessment, and quantitative analysis, with a focus on disaster resilience and hazard modeling.
Email: kimmyeongju0817@gmail.com

EDUCATION

Johns Hopkins University, Whiting School of Engineering
M.S.E. in Geography and Environmental Engineering — Expected May 2027
- Relevant Coursework: Natural Disaster Risk Modeling | Remote Sensing of the Environment | Numerical Methods

Seoul National University of Science and Technology
B.S. in Environmental Engineering and Global technology Management — March 2026
- (Main thesis) *Development and Application of a Multidimensional Green Budget Tagging Framework for Climate and Environmental Public Financial Management in South Korea. - Manuscript under review.*

TECHNICAL SKILLS

- **Analysis:** Statistical analysis, spatial analysis, LCA
- **Data & Technical:** R, Python, Excel, GIS (QGIS), Modeling (WASP, AquaCrop, openLCA)
- **Project & Program Management:** Project Planning, Team Coordination, Stakeholder Engagement
- **Certifications: Google Data Analytics Certificate (**Gained hands-on experience in data cleaning, analysis, and visualization using spreadsheets, SQL, R, and Tableau; developed skills in presenting insights via dashboards and presentations.)

PROFESSIONAL EXPERIENCE

Johns Hopkins University — **Aug 2026 – present**
Research Assistant
- Developing machine learning and hybrid statistical and physics-based models to predict flood extent across the Southeastern U.S. using GIS, geospatial data processing, and quantitative analysis.

SAMJUNG KPMG (KPMG KOREA) — **Nov 2025 – Jun 2026**
Environmental Social Governance Intern COE
- Conducted data analysis to support corporate sustainability reporting and climate-related financial disclosures for clients including Samsung Securities and Hanwha General Insurance.
- Processed and organized environmental and climate-related datasets in accordance with reporting frameworks.
- Contributed to the preparation of sustainability reports by generating data-driven inputs and insights.

United Nations Economic and Social Commission for Asia and the Pacific — **Sep 2024 – Feb 2025**
Intern, Disaster Risk Reduction Division
- Conducted geospatial risk modeling using QGIS and statistical data to enhance disaster monitoring and support infrastructure resilience planning in the Asia-Pacific region.
- Performed data-driven vulnerability assessments by analyzing regional crop calendars to inform food and water security strategies for disaster risk reduction.

Climate Change Youth Organization GEYK (NGO) — **Mar 2023 – Jul 2025**
Project Manager
- Youth Delegate, COP28 & COP29, Led Asian youth Dialogue on climate finance event.
- Led and served as a panelist for the Youth Climate Forum on Food and Water Security (COP28, 300+ attendees), demonstrating expertise in critical resource management.
- Host Korea Local Conference of Youth Program “NextGen's NCQG” under UNFCCC YOUNGO
- EU Climate Action festival booth operation

Korea Institute of Science and Technology, Water Cycle Research Center — **Jun 2023 – Feb 2024**

Intern

- Supported Life Cycle Assessment for Hydrogen peroxide and applied 3-sector analysis (economic, environmental, social) for quantifying value in technology deployment
- Conducted Gas Chromatographic analysis for environmental monitoring and contaminant detection in water systems, building fundamental skills in environmental site assessment.

Environmental Modeling & Chemistry Laboratory **Mar 2023 – Sep 2023**

Undergraduate Researcher

- Modeled the hydraulic and water quality impact of dredging on the Jungnangcheon Stream using the WASP model, providing data-driven insights for water resource management.

Youth Social Innovator Group SK-Rookie **Mar 2022 – Jul 2023**

Project Owner

- Spearheaded the agricultural operations and strategy for the ourgrader brokerage platform, leading intensive Stakeholder Field Research with farmers on the ground.

Vice President, UNEP ANGEL under UNEP Korea Association **Mar 2021 – Sep 2021**

- Managing 3 climate action plans for resilient response

AWARDS & CERTIFICATES

- **(2025) Forest & Sharing Environmental Academic Forum – Merit Prize**
  Analysis of the Domestic Environmental Budget and Strengthening of the Classification System Using the Green Taxonomy
- **(2025) ESG Management Insight Specialist, WE&ME HRD Education Center**
- **(2024) Advanced Training Program for Experts in International Meteorological Standardization**
  Explore the potential for international development of a resilient, digitally enabled transition-based Bee Early Warning System Project
- **(2024) Anti-Corruption and Civil Rights Commission Integrity Debate Competition - Silver Prize**
- **(2024) Youth National Fiscal Master Program: National Fiscal Master, NSI Foundation**
- **(2022) Hult Prize On Campus Business Model Design Competition-- 2nd Place**
  Proposed a Business Model for Solving Rural Labor Shortages
- **(2021) Korea Meteorological Administration Debate Contest - Grand Prize**
  Policy suggestions and discussions for Customized Weather Forecast Information System Using AI for the socially disadvantaged citizen.

TEACHING, SERVICE & LEADERSHIP EXPERIENCE

- **(2022-2023) Director of Public Relations (PR), Student Council, Environmental Engineering Department (2022-2023)**
  Managed external communications and outreach strategies for the department, successfully organizing and promoting 10+ major academic and social events. (2022–2023)
- **(2020) Volunteer Translator, Nanum Korea (2020)**
  Translated educational magazines for children from multicultural families, enhancing accessibility to learning materials and supporting inclusive education initiatives.

PROFESSIONAL TRAINING & PROFESSIONAL MEMBERSHIPS

- **YOUNGO, Official Youth Constituency of the UNFCCC (2023–Present)**
  Participating in youth climate policy discussions and contributing to international climate negotiations.
- **Climate Reality Project Training (2024)**
  Completed intensive leadership training focused on science-backed climate solutions; leveraged expertise for youth education and data-driven advocacy projects.
- **Inter-Korean Green Detente Youth Camp, Minister of Unification (2024)**
